

DECLARATION OF ACCEPTANCE

The regulations for entering or leaving the Kingdom of Saudi Arabia require new methods for the registration of the personal biological characteristics of individuals (fingerprints , iris of the eye etc.)

The examination (comparison) of these characteristics are done at check- in points of Saudi Arabia in an organized and civilized manner that does not violate the personal data of people (workers or travelers).

This is the reason why I do not object to these regulations upon entering the Kingdom of Saudi Arabia.
